DETAILED ACTION

Election/Restrictions

The inventions are distinct, each from the other because of the following reasons:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: The rim surface of 2A

Species II: Fig. 11A

Species III: Fig. 11B

Species IV: Fig. 11C

Species V: Fig. 11D

This application also contains claims directed to the following patentably distinct sub-species of the claimed invention:

Sub-species (i): having an internal surface that is hemispherical

Sub-species (ii): having an internal surface that is oval

Sub-species (iii): having an internal surface that is elliptical

Sub-species (iv): having an internal surface that is oblong.

This application also contains claims directed to the following patentably distinct sub-sub-species of the claimed invention:

Sub-sub-species (A): having an internal diameter that is partly spherical

Sub-sub-species (B): having an internal diameter that is hemispherical

Sub-sub-species (C): having an internal diameter that is less than hemispherical.

This application also contains claims directed to the following patentably distinct sub-sub-sub-species of the claimed invention:

Sub-sub-sub-species (a): a method of making the acetabular liner using a manual method

Sub-sub-sub-species (b): a method of making the acetabular liner using a computer simulation method.

This application also contains claims directed to the following patentably distinct sub-sub-sub-sub-species of the claimed invention:

Sub-sub-sub-sub-species (1): method of implanting without a shell

Sub-sub-sub-sub-species (2): method of implanting with a shell.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added (i.e. Species II, sub-species (iii), sub-sub-species (B), sub-sub-sub-species (a), sub-sub-sub-sub-species (1) which read on claims 1, 8...). An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Smith & Nephew Inc. on September 24, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
